

CAMOUFLAGE 3001

DESIGNED BY BUSK + HERTZOG

PRODUCT DETAILS, TECHNICAL DETAILS
AND FITTING INSTRUCTIONS

MATERIAL: STEEL

AVAILABLE IN 6 FROST FINISHES:

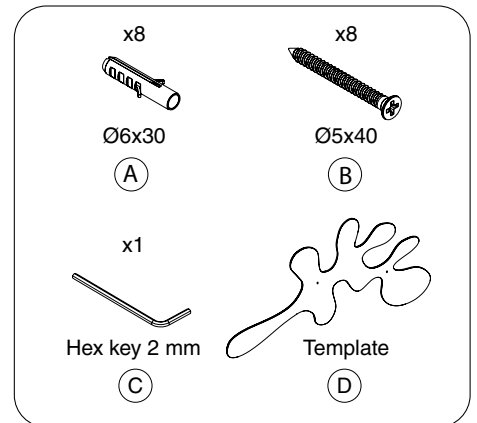

BEFORE INSTALLING

- 1 First, consider how you want your Camouflage system to appear on your wall. There is no right or wrong way to place them. You create your own individual Camouflage configuration.

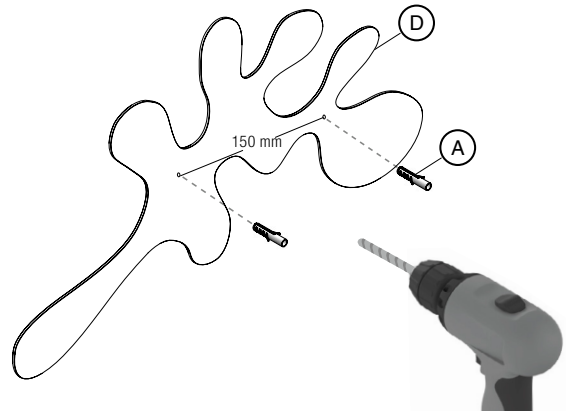

The standard foot height is 65 mm, unless you have purchased the 3-piece camouflage rack set or the separate feet, which offer additional height options of 35 mm and 50 mm. These different heights provide the opportunity to create a three-dimensional camouflage configuration.

MOUNTING

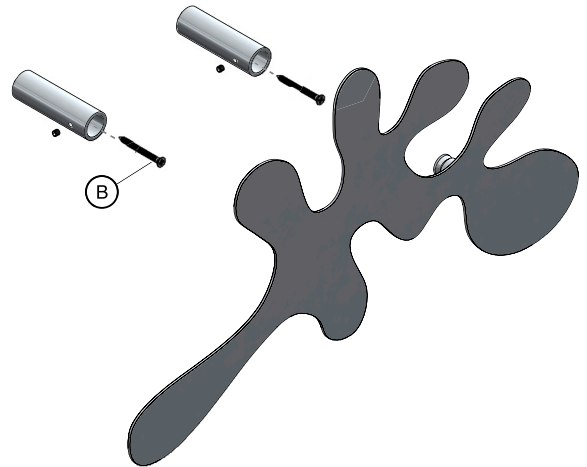

- 1 Use the template (D) and mark the placement of the screw holes for mounting the Camouflage rack on the wall. Each pair of feet must be mounted with a CC distance of 150mm.

Drill out the marked holes with a 6 mm drill bit and insert the enclosed Ø6x30 mm wall plugs (A).

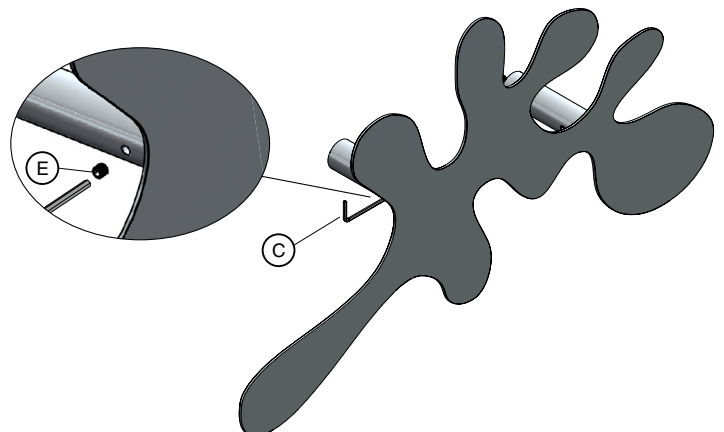

- 2 Secure the Camouflage feet on the wall with the enclosed Ø6x50 mm screws (B) and use a Phillips screwdriver with bit PH2 to tighten the screws.

Press the Camouflage rack on to the feet.

- 3 Securely tighten the set screws (E) on each foot with the hex key (C).

CLEANING AND MAINTENANCE

Surfaces should be cleaned with a microfiber cloth, glass cleaner or other non abrasive and gentle agents.

ATTENTION:

Never use solvents or aggressive household cleaners like bleach, acids (e.g. descalers) or ammonia-based bathroom cleaner to clean the product. Steel wool and hard brushes can permanently damage the surface of the steel.

EXCLUSION OF LIABILITY

FROST accepts no liability whatsoever for damage to persons or property that occurs or has occurred as a result of improper installation or maintenance, particularly if the safety instructions and other points to note listed are not or have not been observed in full.

WARNING AND HAZARD NOTICES

Improper mounting or use can lead to accidents and serious injuries.
